

#645

Acrylic Adhesive Transfer Tape

DESCRIPTION

ETS #645 premium acrylic transfer tape consists of a pure acrylic adhesive system in conjunction with a siliconized Kraft paper release liner. The adhesive is transparent, aging resistant and has a high tack level – suitable for general purpose and high demand bonding and mounting applications. The 645 is also able to withstand elevated temperatures.

APPLICATION

- Splicing of paper and filmic webs, particularly flying splices.
- With heavy adhesive weight – suitable for textured surfaces
- Used for laminating to both closed and open cell foams
- Attachment of nameplates, aluminum, polyester, vinyls, decals, polycarbonates, and papers

PHYSICAL PROPERTIES

| | |
|-------------------------|---------------|
| Backing: | None |
| Adhesive: | Acrylic |
| Total Thickness: | 4.7 mils |
| Adhesion (steel): | 78 oz/inch |
| Temperature Resistance: | -40°F - 230°F |

Physical characteristics shown are averages from tests recommended by our own procedures. A particular roll may vary slightly from these averages. The buyer should determine the suitability for his own use.
